

Secure-Gard[®] Face Shield and Visor Systems

Face shields and visor systems are designed to offer some of the highest levels of protection available during surgical or high-risk* general procedures. Secure-Gard brand face shields and visors are manufactured in the United States.

ALL SECURE-GARD[®] FACE SHIELDS/VISOR SYSTEMS ARE:

- Treated with a patented anti-fogging agent on both sides of the shield to help minimize condensation or fogging that may be caused by many devices used during surgical procedures.
- Manufactured utilizing an ultra-lightweight material for enhanced comfort.
- Interchangeable with every other visor and shield in our system.
- Available in sets or as stand-alone components.
- Pre-scored (shaped) to contour around the face and head for better coverage and improved protection.
- Shipped with a protective sheath between each shield to ensure the anti-fog laminate is not damaged during shipping.
- 7-mil thickness for enhanced protection.

Frame and Shield Packages
