

Closed patient suction system

Closed suction

A whole range of problems are encountered during long-term ventilation in everyday hospital practice. We have developed the OptiFlo closed suction system in order to make ventilation especially safe and hygienic, both for patients and nursing staff.

Optimal safety and infection prevention

Closed suction minimizes the danger of cardiac and pulmonary complications. On top of this, OptiFlo possesses many properties which prevent infections and facilitate care.

The long usage time of 48 hours often reduces costs for your hospital.

Immediately ready to use

- 48 hours usage reduces costs
- antibacterial material for more hygiene

Double-swivel connector

Atraumatic catheter tip

Secretion sight glass

Advantages at a glance

- no disconnection of the tube
- continuous ventilation
- no PEEP loss
- no drop in saturation
- secretion control
- reduction of cerebral pressure
- improved patient tolerance
- extra-soft sleeve
- **replacement interval 48 hours**

Children, DEHP-free, Y-connector

Size	Length	REF	Packing unit
CH 05	31 cm	43.004.60.050	60
CH 06	31 cm	43.004.60.060	60
CH 07	31 cm	43.004.60.070	60
CH 08	31 cm	43.004.60.080	60

Children, DEHP-free, elbow

Size	Length	REF	Packing unit
CH 05	31 cm	43.004.60.055	60
CH 06	31 cm	43.004.60.065	60
CH 07	31 cm	43.004.60.075	60
CH 08	54 cm	43.004.60.085	60

Adults, DEHP-free

Size	Length	REF	Packing unit
CH 10	54 cm	43.004.60.100	60
CH 12	54 cm	43.004.60.120	60
CH 14	54 cm	43.004.60.140	60
CH 16	54 cm	43.004.60.160	60
CH 18	54 cm	43.004.60.180	60

Extra-long version, DEHP-free

Size	Length	REF	Packing unit
CH 12	60 cm	43.004.66.120	60
CH 14	60 cm	43.004.66.140	60
CH 16	60 cm	43.004.66.160	60

Tracheostomized patients, DEHP-free

Size	Length	REF	Packing unit
CH 12	34 cm	43.004.60.121	60
CH 14	34 cm	43.004.60.141	60
CH 16	34 cm	43.004.60.161	60
