

PRODUCT SHEET

2% CHG ANTISEPTIC BODY WASH

1/2

Proven effectiveness against MRSA, VRE and ESBL in 1 minute!

The patients' skin is a source of bacteria that can cause infection. By rapidly removing the bacteria from the skin and providing persistent antimicrobial effect, the risk of infections is reduced.

Swash[®] antiseptic products offer a mild antiseptic bathing system impregnated with a rinse-free, 2% Chlorhexidine Digluconate cleansing lotion. This lotion kills harmful bacteria on the skin and hair and eliminates a wide variety of microorganisms that can cause infections. The active ingredient stays on the skin and hair for persistent decolonisation.

LYOCELL

The cloth of Swash[®] bathing products is, among other materials made from the wood fiber Lyocell. This natural fibre is characterised by its purity, softness and absorbency. Lyocell is produced in an environmentally friendly manner. The innovative production process that recycles both energy and water, ensures that the environment is burdened as little as possible.

Swash® Bathing Gloves / Wipes Antiseptic:

The pre-moist gloves/wipes offer a full antiseptic body wash. The gloves/wipes are made of firm, soft cloth based on cross-lapped Spunlace (Non-woven) that has a light relief (embossing), which gives a pleasant feeling on the skin. The gloves are produced using an ultrasonic welding technique, which ensures that a sufficiently strong glove is maintained. The glove makes it easier to clean difficult to reach body parts.

Swash® Antiseptic Cap:

The impregnated cap offers an antiseptic hair wash. The packaging contains an eye and ear protector, which ensures that the antiseptic lotion does not come into contact with the eyes and ears. Swash® Antiseptic Cap has a diameter of 30 cm and is made of a Needle punch non-woven material. The plasticised outside protects the hands of the caregiver.
