

INCONTINENCE CARE +PLUS

Helps to prevent the occurrence of Incontinence-Associated Dermatitis (IAD)

Swash[®] Incontinence Care prevents the development of IAD and keeps it from spreading in its early stages, before the condition can worsen and pressure ulcers can occur. The extended line of Swash[®] Incontinence Care products can help the skin to recover faster thanks to its innovative and enhanced Trixotric[®]-formula.

The **Swash[®] Perineum** 3-in-1 incontinence care products are intended to **clean**, **care** for and **protect** the skin – in only one simple step. **Swash[®] Perineum⁺** takes incontinence care one step further: The 4-in-1 incontinence care products are designed not only to **clean**, **care** for and **protect**, but also to help the skin to **restore**. This step is possible thanks to the newly developed lotion with Trixotric[®] – a formula which helps the skin to restore faster.

The combination of several products into one simplifies incontinence care. While traditional incontinence care requires several different steps and products, thanks to Swash Perineum⁺ ingredients, skin regimen can now be done in one single action. As a result, it is more comfortable for the care recipient, more convenient for the caregiver and encourages adherence to the care regimen.

Characteristics of the Swash[®] incontinence products:

Protective barrier with **3% Dimethicone**

100% fragrance-free with neutral smell. Dermatologically **tested**.

pH skin-neutral and **hypoallergenic** lotion

Products can be **warmed**

Contains **caring ingredients** such as Vitamin E, Hyaluronic Acid and Glycerine

Clean Room production guarantees high quality product

Free from formaldehyde releasers

Made in **Holland** using a **fully automated production process**

Trixotric[®]: Enhanced formula exclusive to **Swash[®] Perineum⁺** helps the skin to restore

LYOCELL[®]

The cloth of Swash[®] bathing products is, among other materials made from the wood fiber Lyocell. This natural fibre is characterised by its purity, softness and absorbency. Lyocell is produced in an environmentally friendly manner. The innovative production process that recycles both energy and water, ensures that the environment is burdened as little as possible

Product overview:

Swash® incontinence products

Swash® Perineum 3-in-1 products are moistened wash gloves or wipes infused with a skin **protectant**, 3% Dimethicone. This silicon-based oil leaves a thin layer on the skin, protecting it from humidity and irritation while being non-occlusive, hence allowing the skin to breath.

Swash® Perineum+ 4-in-1 products have the benefits of the 3-in-1 products plus the special **Trixotric®-Formula**: The Swash® Perineum+ products put a protective, but breathable, layer on the skin, while supporting the skin’s restoration with the help of the **Trixotric®-hydrogel** – a combination of hyaluronic acid, hydrogel and natural clay.

The perineal area can be cleaned thoroughly while being nourished with skin care ingredients such as vitamin E, glycerin, hyaluronic acid, caprylyl glycol and glyceryl caprylate. Even severe contamination or incrustation can be removed with ease. Swash® is produced with a low-linting cloth and the combination of fibres, TENCEL® and polyester, ensures the optimal quality of the products.

Swash® Perineum+ Wipes
CLEAN – CARE – PROTECT
HELP TO RESTORE

The Wipes are made of a soft cloth Spunlace (non-woven) with a light relief for a good feel on the skin. Its special length helps to make incontinence hygienic, easy and comfortable.

4-in-1 Solution 
 with 3% Dimethicone & Trixotric®
