FlexAgrip™ Catheter Securement Device
The only catheter securement device with shape memory technology

The patented FlexAgrip™ Catheter Securement Device, with shape memory properties, was designed to take the shape of any type of catheter providing superior catheter securement. The FlexAgrip™ device was engineered to withstand high pull forces while providing patient comfort due to its soft, breathable materials used.

FlexAgrip™

Universal Notches

Soft Breathable Materials
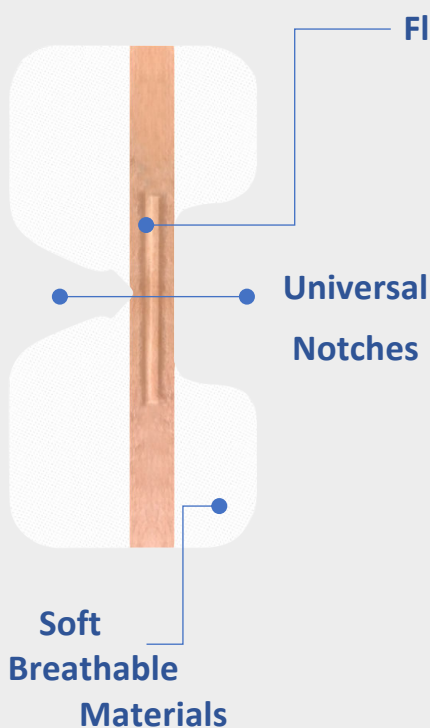

→ **Increased catheter dwell time**

→ **Reduced catheter complications**

→ **Less application steps**

→ **Compliments existing IV dressing protocols**

Product Code: FGS0109
