

Closed patient suction system

Safe Clean Closed suction

A whole range of problems are encountered during long-term ventilation in everyday hospital practice. We have developed the OptiFlo closed suction system in order to make ventilation especially safe and hygienic, both for patients and nursing staff.

Lockable Rinsing Chamber

In answer to user needs, we have now extended the service life of our OptiFlo to 72 hours, and we have also developed a lockable rinsing chamber. As a result, OptiFlo is even safer whilst remaining perfectly simple to use.

In addition, its new features means it saves time and storage space in your hospital.

- 1. suction:
- 2. rinsing/safe cleaning:

- easy to implement
- no reflux in the trachea
- more hygiene & safety

Closable rinsing chamber

Adults, DEHP-free

	Size	Length	REF	Packing unit
	CH 10	56 cm	43.004.57.100	60
	CH 12	56 cm	43.004.57.120	60
	CH 14	56 cm	43.004.57.140	60
	CH 16	56 cm	43.004.57.160	60

Extra-long version, DEHP-free

	Size	Length	REF	Packing unit
	CH 14	62 cm	43.004.57.142	60
	CH 16	62 cm	43.004.57.162	60

Tracheostomized patients, DEHP-free

	Size	Length	REF	Packing unit
	CH 12	36 cm	43.004.57.121	60
	CH 14	36 cm	43.004.57.141	60
	CH 16	36 cm	43.004.57.161	60

Advantages at a glance

- no disconnection of the tube
- continuous ventilation
- no PEEP loss
- improved PEEP seal
- no drop in saturation
- secretion control
- antibacterial catheter material
- reduction of cerebral pressure
- improved patient tolerance
- extra-soft sleeve
- **lockable rinsing chamber**
- **replacement interval 72 hours**
