

Surgical Drapes, Gowns and Ancillary Products

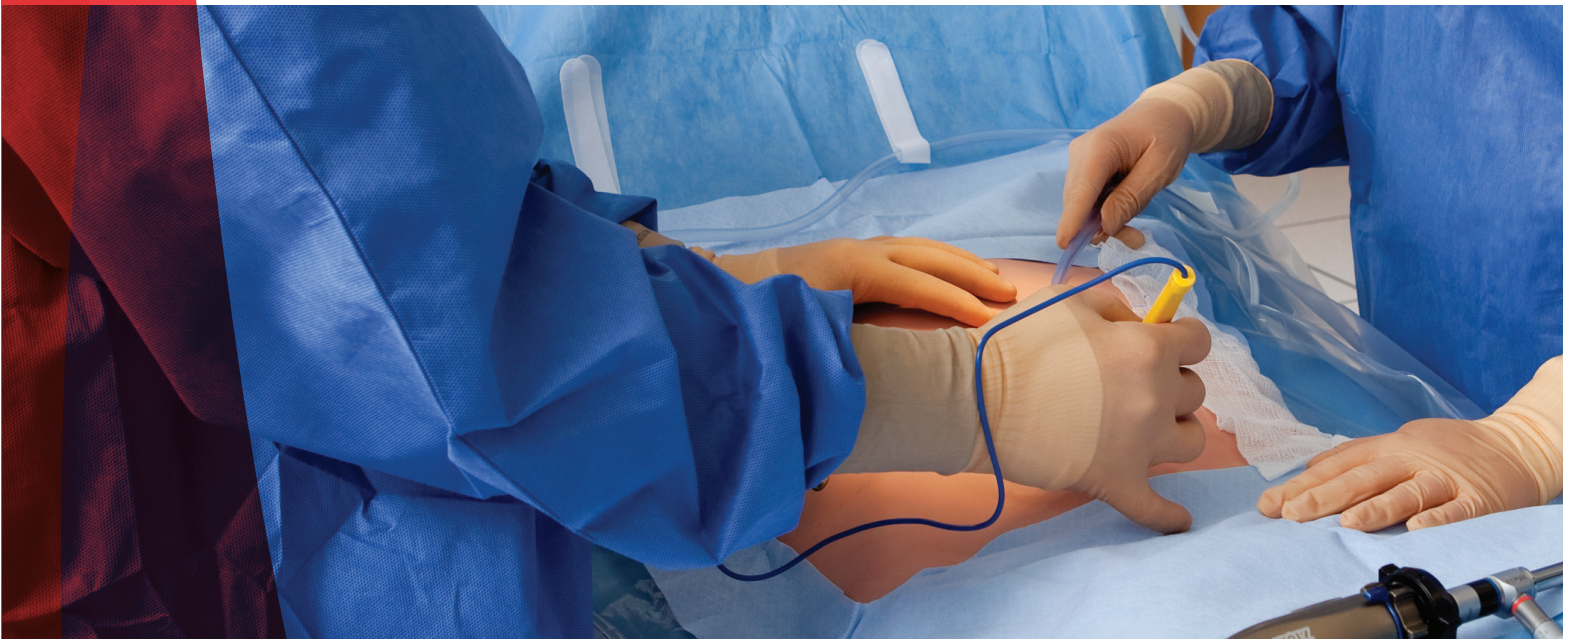

Distributed by

Cardinal Health provides a complete selection of surgical drapes, gowns and ancillary products that offers patients and clinicians the protection they want and need.

Our enhanced line of Tiburon® Surgical Drapes provides improved drapeability*, additional cord management features* and AAMI level 4 protection. Additionally, our surgical gowns offer AAMI level 3 (Astound® Surgical Gowns) and AAMI level 4 protection (SmartGown™ Surgical Gowns) to help keep you safe from potentially harmful elements, allowing you to focus on what matters most – your patients. In developing our portfolio of products, we worked closely with healthcare professionals, like you, to make sure that your needs and expectations were not just met, but exceeded.

*As compared to prior Tiburon® Surgical Drape design.

Surgical gowns

Be in the know and know you are protected with Cardinal Health™ Surgical Gowns.

Inspired by long days on your feet, our surgical gowns stand up to the rigors of your work, helping to keep you safe from potentially harmful elements.

In creating SmartGown™ and Astound® Surgical Gowns, we worked closely with healthcare professionals like you to make sure your needs and expectations were not just met, but exceeded.

What will you be wearing?

It's important to choose the right gown for the right procedure. While there are many factors that go into choosing the right surgical gown, the questions below may help as you evaluate the different gowns and levels of protection available:

- What type of procedure is being performed?
- How long will the procedure last?
- How much fluid will be present during the case?
- What is the clinician's role in the procedure?²

AAMI levels

All surgical gowns are categorized by a barrier performance level which is designated by the AAMI and based on Standard PB70:2012.

All Cardinal Health™ Surgical Drapes and Gowns meet the EN13795 Standard

AAMI Levels determined per ANSI/AAMI PB70:2012

Tiburon® Surgical Drapes and Packs

Tiburon® Surgical Drapes are engineered to pass the industry standard tests that measure fluid penetration to provide AAMI level 4 protection. They are resistant to abrasion and puncture, yet their flexible, cloth-like properties allow them to drape naturally, following the contours of the patient.

Classified as a Level 4 device under the AAMI guidelines for barrier performance in the critical zone, Tiburon® Surgical Drapes provide the highest level of barrier protection available in a surgical drape.

You asked. We Listened.

The next-generation of Tiburon® Surgical Drapes delivers improved drapeability and additional cord management features.

Features and benefits of the next-generation Tiburon® Surgical Drape include:*

- AAMI Level 4 protection
- High-performance SMS material that customers know and trust
- Designed to stay in place throughout the procedure; avoids slippage
- Softer fabric for enhanced drapeability
- Velcro® Tabs for cord management on select codes
- Fabric anesthesia screen on select codes

Enhanced by technology

- We're pleased to bring to the market surgical drapes with proven SMS fabric that continue to deliver protection and performance.

Improved by you

- You asked for a more drapeable fabric; we listened.
- You asked for better cord management; we delivered.
- Your feedback helped us develop the next-generation Tiburon® Surgical Drapes.

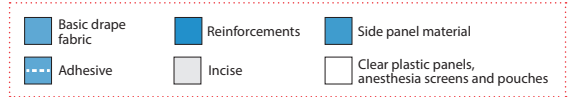

AAMI Levels determined per ANSI/AAMI PB70:2012
